

# DEVOPS WORKFLOW

## *Steps by Step*

### CONTINUOUS DEVELOPMENT

Developers frequently commit code changes to a shared repository

1

### CONTINUOUS INTEGRATION

Code changes are automatically built, tested, and merged into the shared repository.

2

### CONTINUOUS TESTING

Automated tests are run on code changes to ensure quality.

3

### CONTINUOUS MONITORING AND FEEDBACK

Applications are monitored in production to collect feedback and identify issues.

4

### CONTINUOUS DELIVERY

Code changes are automatically released to production.

5

### CONTINUOUS DEPLOYMENT

Code changes are automatically deployed to production without manual intervention.
